Minimum requirements:

WordPress Version	: 5.2.0
-------------------	---------

PHP Version :7.2.x+

MySQL Version :5.7.x+

https://wordpress.org/about/requirements/

Zip upload installation method (make sure uploads up to 2MB are allowed for your hosting):

How To Import Divi Layout:-

Steps for importing layout:

- Open WordPress Dashboard -> Activate Divi Parent Theme->Start By Downloading Zip File and <u>Xml File</u>
- 2. Unzip files and you will find one copy of each ie XML File(media.xml, post.xml, project.xml), Layout JSON File, and CSS File.
- Import post xml / media xml file only in our case under Tools -> Import -> WordPress Import
- 4. You need to import ' Media XML '(There may be 2 or more media xml files in the folder) 2-3 times depending upon server / internet speed till you get the message as shown in the screenshot below.

All done. <u>Have fun!</u> Remember to update the passwords and roles of imported users.

5. Import Layout (.json) file under Divi -> Divi Library -> Import & Export Button

Further Explaination :-

- For ' Foodies ' we have created JSON file for each Page Version / Menu Blurbs that you can import via Page / Library both.

That is you can find 2 folders in Zip folder as A. Library JSON B. Page JSON.

- In Each folder you will find JSON files for each Page Version / Menu Blurb. You need to import one JSON at a time to make it work ie for example if you want to load 'Blog V1 ' you need import 'Blog V1 Library.JSON' as mentioned in the step 5.

- Similarly y	ou can im	port all Page	Version /	Menu	Blurb	Individually
