Theme Installation Guide

Visit : <u>https://divithemecenter.com/blog-child-theme-installation-guide/</u>

Author: Divi Theme Center

Minimum requirements:

WordPress Version	: 4.9.8
PHP Version	: 7.2.x+
MySQL Version	: 5.7.x+

https://wordpress.org/about/requirements/ Zip upload installation method (make sure uploads up to 2MB are allowed for your hosting):

Essentials :-

You need to have 'Divi ' from <u>www.elegantthemes.com/join/</u> in order to make our 'child theme work '

1.Installation Steps:

1. Login to your WordPress site administrator panel and head over the Appearances \rightarrow Themes

- 2. Click 'Add New'
- 3. Choose the 'Upload' option.
- 4. First Activate Divi Parent Theme By Uploading a copy Available With You.
- Install and activate copy of 'Child Theme ' Zip after extracting the 'Main' product Zip you have got as a product file .
- **6.** Make Sure You upload only **`Child Theme** `Zip under **Appearance -> Themes** and not the complete Zip file which have other files too.

7. After activating Child Theme at top you will see the notification as ' **begin installing plugin**' plugin name: '**one click demo import+ other plugins needed'**. Click on that link to install concern plugin.

Screenshot:-

Dashboard
Migration Almost Complete! Reserved Duplicator installation files have been detected in the root directory. Please delete these installation files to avoid security issues. Go to:Duplicator > Tools > Information >Stored Data and click the "Remove Installation Files" button <u>Take me there now!</u>
click here
This theme requires the following plugin: <u>One Click Demo Import</u> . Begin installing plugin <u>Dismiss this notice</u>

8. Go To **"Appearance**". Click on **"Import Demo Data**" and Click on "Import Demo Data" Button. This will import Child Theme Content into your site.

9. Go to Appearance > Menus. Assign the menu as the primary menu.

10. Go to Divi and Click on "Child Theme Settings" and set

additional settings as per need.

11. To Import Logo You Need Import JSON File : Go To "**Divi Theme Option**". Import JSON and Click on Import.

2.FTP uploads installation method:

1.Upload `**Child Theme** ` Zip as well `Divi ` Zip that you purchased to /wp-content/themes/ directory using your FTP client.

- 2. Extract both the Zip in the same folder.
- 3. Activate the Theme through the 'Appearance > Themes 'Menu'
- 4. Go to the 'WordPress Admin ' and repeat step " 1 to 15 " above

Finally enjoy it.

Install Theme Builder JSON:

A.Installation Steps:

1.You need import ' **Theme Builder** ' json available in the supplementary zip and is mandatory.

Now Hover over to **Divi > Theme Builder** and click on **' Portability '** Button at the top right corner.

Disi Theore Duilder			 -	
Divi Theme Builder			 U	
			1	P
Add Global Header	•		/	
Add Global Body	o	0		
Add Global Footer	O	Add New Template

E. Back To Top Options:

After Recent Divi Update Need Configure ' Performance Tab ' Under Divi – > Theme Options – > General ? (Consider This As Mandatory Step If You See Discrepancy In Some of The Sections Not Loading Properly After One Click)

Steps 1:

Simply ' Disable 3 Tabs ' under ' Performance Tab ' and you are good to go

- 1. Go To "Divi Theme Option".
- 2. Go To Divi -> Theme Options -> General Tab -> Click Performance Tab

Try disable tab A. Enqueue jQuery Compatibility Script B. Defer Additional Third Party Scripts C. Defer jQuery & jQuery Migrate

Save the changes

Defer jQuery And jQuery Migrate		3	
Enqueue jQuery Compatibility Script	DISABLED	2	Try Disable Sequence Wise And Check Front End To Check Results
Defer Additional Third Party Scripts	DISABLED	1	

Still Issue ?

Step 2:

In Same General Tab -> Performance -> Disabled Dynamic CSS Button

Step 3:

It happens some of images is **Not Loading** due to non https issue depending upon whether your site have SSL or not and can install content fixer plugin below and activate to fix insecure content on the site
